DM 1952NF

双步进智能针送料带侧切刀平缝机

Double Step Smart Needle Feed Belt Side Knife
Lockstitch Sewing Machine

全新触控显示屏

4.3英寸彩色触摸屏，内容直观，操作方便。
4.3 inch colorful touch panel, clearly and easy to operate.

无轴承主轴伺服马达

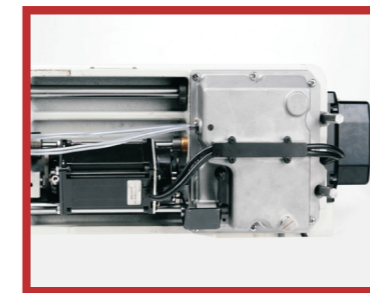

直接使用主轴作为电机轴，无需用联轴器连接，主轴刚性好、力矩轻，电机运转声音轻
The main shaft is directly used as the motor shaft, no need to use a coupling to connect, the main shaft has good rigidity, light torque, and the motor runs lightly.

针送料结构

本机采用连杆式针送料结构，针送料方式使送料特性更加稳定，缝层之间不易产生滑移。
The machine adopt connecting rod control feeding system, the needle feeding method make the feeding system more stable, during multi-sewing the fabric not easy to moving.

本机通过针送布防止缝纫料的层移动和过梗的针迹堆积。调节操作简便、设计精巧、省时省力，使缝制与切除缝料边一次完成。采用电机控制针脚长度、倒回缝、剪线无声、可缝制 8 不同线迹。适用于缝制各种服装、男女衬衫、童装、床单、窗帘等。

The machine adopt Needle feed system Prevention the fabric moving and during sewing the thick cloth stitch length change, with reasonable position design, convenient and reliable operation so that you can easily change sewing technology: side cutting or normal sewing. Adopt step motor control stitch length, reserve sewing, silent trimmer and 8 type different stitch pattern. Suitable for almost clothing, especially T-shirt, Children's clothing, sheets, curtains, etc.

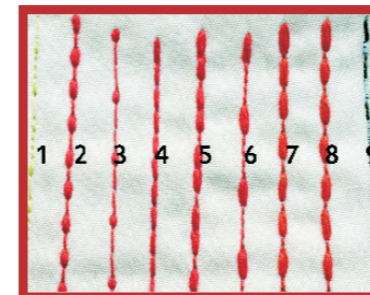

步进电机双向控制： Stepper motor bidirectional control:

步进电机控制抬压脚与剪线（专利技术）：方便压脚高度调整、压脚升降无噪声，剪线无噪声。
Stepping motor controls presser foot lifting and thread trimming (patented technology): convenient for presser foot height adjustment, presser foot lifting and lowering noiseless, no noise for thread trimming

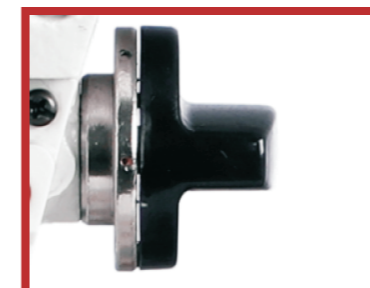

多功能补针开关： Multi-function needle compensation switch:

可实现变针距补针功能。
It can realize the function of changing stitch length to make up the needle

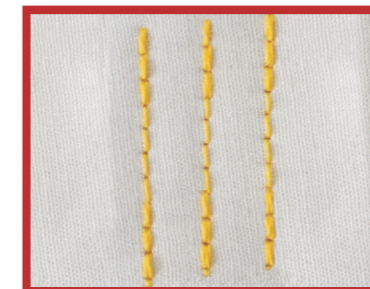

可编辑花样缝： Editable pattern stitch:

由步进马达控制，可以自己设定产生花样线迹，实现刀车与花样平缝机的完美融合。
Controlled by a stepping motor, you can set your own pattern stitches to achieve the perfect integration of the knife car and the pattern lockstitch sewing machine

可离合式切刀开关： Clutchable knife switch:

实现切布与非切布缝制功能切换。
Realize the switching of cutting and non-cutting sewing functions

高品质的加固缝线迹： High-quality reinforcement stitches:

步进电机控制针距与倒缝：针距精准、倒缝无噪声；前、后加密缝功能有效缩短留在缝料上的线头长度，防止线头松散。
Stepping motor controls the stitch length and reverse stitching: precise stitch length, no noise in reverse stitching; The front and back dense sewing function effectively shortens the length of the thread left on the sewing material and prevents the thread from loosening.

电子膝靠： Electronic knee rest:

比传统机械膝靠更加轻柔，减小操作负荷。
Softer than traditional mechanical knees, reducing operating load
