DM 1949X

电子差动送料步进三驱平缝机

Electronic Differential Feeding Step Three-drive Lockstitch Sewing Machine

DM1949X

电子差动送料步进三驱平缝机

Electronic Differential Feeding

Step Three-drive Lockstitch Sewing Machine

多段差动缝功能

可编辑储存不同差动比的缝制，实现多段差动缝的快捷切换。

Multi-stage differential sewing function

The sewing of different differential ratios can be edited and stored to realize quick switching of multi-stage differential sewing.

步进电机控制上差动量

调节上送布压脚运动轨迹，适应不同布料的吃省缝制以及打皱工艺。

Stepper Motor Controls Upper Differential Momentum

Adjust the movement track of the upper feed presser foot to adapt to the sewing and wrinkling process of different fabrics.

双动刀剪线

可在机针正下方完成剪线，缝纫后线头最短3mm，有效减少人工剪线的工作量。

Pouble rounne movable blufe thread trimmer:

Achieve trimmer thread can below needle, remaining thread can be as short as 3MM, effectively reduce man manual trimming workload.

花样缝

步进马达控制，1949X可以自己设定产生9种花样线迹。

Pattern stitch:

Due to the stepping motor control, 1949X can be set to generate 9 different stitches.

电子松线

相比传统机械松线更加稳定可靠。

Electronic thread tension device:

Compare with mechanical wire, it's more steable.

电子膝靠

不改变工人的操作习惯,实际轻松抬压脚。

Electronic knee control:

It's easy to lift the presser foot and no need change worker's sewing habit.

步进驱动上差动

Up and down feeding & stepping three-wheel drive

专利步进三驱技术，一个步进电机控制针距、剪线以及抬压脚功能，

上下送料可精准控制上送布量，满足各种缝制工艺的吃省、打皱等特殊工艺。

The patented stepping three-drive technology, a stepping motor controls the needle distance, thread trimming and presser foot lifting functions, it can precisely control the upper feeding amount, which can meet the special processes such as eating and wrinkling of various sewing processes.
